

Low profile acoustic cabinet fans, manufactured from galvanised sheet steel and internally lined with 50mm thickness of fireproof acoustic fiberglass insulation (M0), with sound-absorbent insulation at the inlet. All models incorporate inlet and discharge circular duct connection flanges with integrated rubber air seal. Direct drive backward curved centrifugal fan.

Motor

Brushless EC motor with high efficiency and low consumption, supply 230V +/- 10%-50/60Hz, IP44, ball bearings, thermal protection and ON/OFF switch.

Additional information

Working temperature between -20°C up to +40°C.

This cabinet fan is suitable for mounting in any orientation and designed for indoor use.

Integrated control

It is supplied with integrated plug&play control, pre-configured to work at constant pressure (COP) with the following pressure setpoint depending on the model:

- CAB-125: 100 Pa
- CAB-150 a 315: 150 Pa
- CAB-355 and 400: 200 Pa

By acquiring the programming console PROSYS ECOWATT, there will be access to the settings of constant pressure mode (COP) in addition to other 3 modes:

- Constant airflow (CAV)
- Proportional (VAV)
- Minimum-Maximum
- Timer (in combination with TIMER RTC accessory).

ON-OFF switch

Low noise level
Acoustic insulation of 50 mm thickness fireproof fibreglass (M0) with a high resistance coating reducing the noise level significantly.

Sound-absorbent insulation at the inlet.

Constant pressure mode (COP)

- Minimum speed of fan between 0-50%
- Maximum speed of fan between 50-100%
- Night position adjustable between 25-100% of pressure at maximum speed.

Constant airflow mode (CAV)
(except 125 model)

- Minimum speed of fan between 0-50%
- Maximum speed of fan between 50-100%
- Night position adjustable between 25-100% of airflow at maximum speed.

Proportional mode (VAV)

- Up to 2 analogue inputs, 0-10V or 4-20mA.
- Maximum demand selection when 2 analogue inputs are connected
- Minimum speed of fan between 0-50%
- Maximum speed of fan between 50-100%
- Alarm relay output

Minimum-maximum mode

- Digital input to select speed
- Minimum speed of fan between 0-50%
- Maximum speed of fan between 50-100%

Timer (RTC)

By acquiring TIMER RTC accessory jointly with programming console PROSYS ECOWATT the unit can be set to work in time bands.

- Until three daily periods with the desired instruction.
- Holiday period.

Modbus RTU

This serie is able to be controlled and displayed via Modbus-RTU network.

Direct drive backward centrifugal impeller

Installation in any orientation
Possibility to be installed upright, horizontal or inverted.

TECHNICAL CHARACTERISTICS

Before installation check that the product electrical characteristics listed on the data plate label (voltage, power, frequency, etc.) match those of the intended electrical supply.

PERFORMANCE CURVES

- q_v : Airflow in m^3/h .
- p_{st} : Static pressure in Pa.
- SFP: Specific fan power in $W/m^3/s$ (blue curves).
- Dry air at 20°C and 760 mmHg.
- Performance data in accordance with ISO 5801 and AMCA 210-99 Standards.

MOUNTING ACCESSORIES

MBE
 Electric heaters.

MFL-G4
 Filtration boxes.

ACOPEL F400 N
 Circular flexible connector.

KSE-45
 Flexible supports
 Rubber anti-vibration mounts to reduce vibration and noise transmission to the installation.
 (1KSE = set of 4 supports per bag).

CAR
 Circular back draft shutters.

APC
 Discharge protection guards for direct connection to the inlet-outlet flange.
 (please see pages Mounting Accessories).

ELECTRICAL ACCESSORIES

PROSYS ECOWATT
 Programmation console.

TIMER RTC ECOWATT
 Electronic timer module.

SC02-A
 CO₂ and temperature sensor.
SC02-AD
 CO₂ and temperature sensor, with display.
SCHT-AD
 CO₂ sensor, temperature and relative humidity with display.

REMP
 Motorised dampers.

CPTA-S/CPTA-E
 Presence detector.

AIRSENS RF / REC.AIRSENS RF
 Single-phase speed controller.
